NOTICE TO MANUFACTURERS.—

For some time past, we have been engaged in building, and preparing to build, "Brundred's Patent Throstle." Having now completed our stock of tools for that purpose, we are able to build these machines with greater a curacy and dispatch than previously, and to recommend them with confidence to the attention of manufacturers. These machines have been in successful operation for the last four years. They will do as much work as the Danforth Throstle, with one third of the power. The twist is more uniform than from any banded spindle, the use of bands being dispensed with. In strength and durability, this Throstle is asknowledged, by competent indiges, to excel every other spinning machine. Many of the Live-Smidle Throstle can be altered to the new principle, so as to turn off mearly double the former quantity of work. The Danforth Throstle can also be altered, so as to give the full quantity of year, though reducing the power at least two thirds. These Throstles are now in active operation in the factorics of Miscers, J. P. Chrysler S. Co., of Kinderhook, and Alfred Wild, Esq. of Consest Falls, to whom we refer the public for information as to their practical working. We are prepared, as usual, to execute orders for Cotton, Wieden and First Machinery, Casting, Mill Gearing, Shalting, P.
